

KRUUSE Urology

KRUUSE Urinary Products

Catheter design for best practice clinical application and improved patient care.

We know that vets and vet nurses across the continents expect KRUUSE to be at the forefront of innovation and development. We do our utmost to live up to your expectations by constantly looking into new ways to **improve animal well-being and health by preventing and reducing suffering.**

Our Urology product range is no exception!

We came **1st in veterinary medicine** with our hydrophilic coated BUSTER HC Urinary Catheter. A catheter type that, not surprisingly, is preferred by human patients as the hydrophilic coating reduces friction in the urethra and hence provides uncomplicated catheterisation.

And we continue to come up with new innovative catheters.

Highlights!

BUSTER Foley Plus Catheter is soft and flexible. High biocompatibility provides extra patient comfort making it suitable for long-term placement.

The open-end BUSTER Dog Flushing Catheter provides optimal conditions for flushing of the urethra to relieve urethral obstruction.

KRUUSE catheter assortment includes a full range of urinary catheters for cats and dogs - everything you need for best practice catheterisation and patient care.

BUSTER Foley Plus Catheter

2-way catheter with retention balloon, high biocompatibility and suitable for long term placement.

Perfect for

- Drainage purposes
- Urine sampling
- Bladder lavage

User-friendly

- Easy placement
- Radiopaque
- Size colour-coding

Patient comfort

- Soft and flexible
- High biocompatibility
- Long-term placement

Improved patient safety

The retention balloon secures the catheter in situ and the rounded tip and atraumatic side holes help avoid tissue damage. The highly biocompatible silicone makes the catheter suitable for long-term placement up to 7 days.

Easy insertion - no wire

The catheter is made of white silicone with an added substance that increases the shore of the catheter. This means that the catheter rigidity is increased and therefore does not require a wire for insertion.

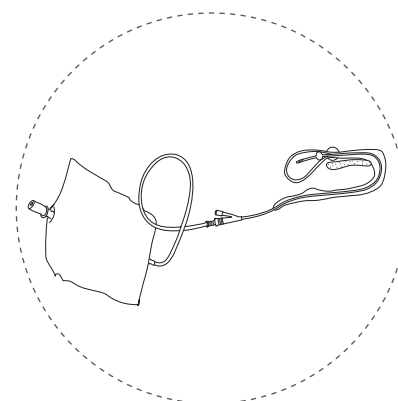

Insert the catheter through urethra into the bladder

Fill the balloon with isotonic saline

Connect a BUSTER Urine Bag to collect and control urine flow

Cat. No	Description	Type	Size, Metric	Size, Imperial	Colour	Package
273880	BUSTER Foley Plus Catheter	Side holes, without wire	2 mm x 30 cm	6 Fr x 12 in	●	5/pk

BUSTER Foley Catheter, Silicone

2-way catheter in 100% silicone with 3-5 cc (ml) retention balloon and stylet. Catheter has rounded tip and atraumatic side holes, and as silicone is very biocompatible, it is suitable for longer placement in urethra/bladder (up to 7 days).

- Silicone catheter with high biocompatibility
- Suitable for long term placement
- Easy-removable steel wire
- Colour-coded cap for easy size recognition

How to use...

Insert the catheter through urethra into the bladder

Gently remove the steel wire

Fill the balloon with isotonic saline

Cat. No	Description	Type	Size, Metric	Size, Imperial	Colour	Package

BUSTER HC Dog Catheter

- Hydrophilic Coated

**KRUUSE INTRODUCES A 1ST
IN VETERINARY MEDICINE**

In line with our present range of products, this product is based on our belief that veterinary patients should have access to the same standard of consumables as human patients.

What is so revolutionary about this urinary catheter? The full length of the catheter has a hydrophilic coating. When the coating is activated in water, the result is a very smooth and viscous surface throughout the entire length of the catheter. The hydrophilic coating significantly decreases friction in the dog's urethra – providing obvious benefits to canine patients.

This helps to decrease patient discomfort and to prevent iatrogenic damage to the urethra. Hydrophilic coated catheters provide additional benefits such as less microscopic haematuria and decreased incidence of iatrogenic UTI (urinary tract infection).

How to use...

Open the pouch

Pour suitable water in the pouch

Fix it on a tile if desired.
Wait 30 sec

The catheter is ready for catheterization

NB: The catheter must not be left in the urethra for more than 10 minutes

Scan the QR-code to see the video "How to.."

Cat. No	Description	Type	Size, Metric	Size, Imperial	Colour	Package
273800	BUSTER HC Dog Catheter	Hydrophilic Coated, side holes	1.6 mm x 50 cm	5 Fr x 20 in		5/pk
273801	BUSTER HC Dog Catheter	Hydrophilic Coated, side holes	2.0 mm x 50 cm	6 Fr x 20 in		5/pk
273802	BUSTER HC Dog Catheter	Hydrophilic Coated, side holes	2.6 mm x 50 cm	8 Fr x 20 in		5/pk
273803	BUSTER HC Dog Catheter	Hydrophilic Coated, side holes	3.3 mm x 50 cm	10 Fr x 20 in		5/pk

Features and benefits

Viscous surface

Hydrophilic coating results in a very smooth and viscous surface

Reduce friction

Hydrophilic coating reduces friction of the catheter in the urethra and helps prevent iatrogenic damage of urethra

Lower infection risk

Hydrophilic coating and atraumatic drainage holes significantly reduce the risk of bladder infection

Uncomplicated catheterization

No need for using gel on the catheter - this simplifies the management with catheters

Even distribution

The coating is more even applied on the catheter compared to gel

Easy size recognition

Colour-coded luer lock fitting and label for easy size recognition

Convenient and fast access to the catheters

User-friendly end-opening box and individually packed pouches

BUSTER NC Dog Catheter

-Non Coated

BUSTER NC Dog Catheter is a soft and biocompatible catheter. It is made from DEHP- free (phthalate free) medical grade PVC. The soft catheter is less likely to cause damages to the mucous membranes in urethra and in the bladder compared to the more rigid catheters.

- Atraumatic polished lateral drainage holes
- High biocompatibility
- Suitable for short and medium-long placement (up to 3 days)
- Colour-coded luer lock fitting for easy size recognition
- User-friendly end-opening box

FOR INCREASED PATIENT COMFORT

How to use...

Open the pouch

Add gel

The catheter is ready for catheterization

BUSTER Dog Catheter

The popular range of BUSTER Dog Catheter now consists of 7 sizes of catheters!

- Female luer lock fitting
- Rigid though flexible polypropylene catheter tubing for easy introduction
- Rounded end and atraumatic side holes to avoid tissue damage
- Userfriendly blister packaging

Cat. No	Description	Type	Size, Metric	Size, Imperial	Package

273430	BUSTER Dog Catheter	Side holes	3.3 mm x 50 cm	10Fr x 20 in	12/pk

Rounded end and atraumatic side holes

Flexible polypropylene tubing

Female luer lock fitting

BUSTER Dog Flushing Catheter, Open End

Based on the popular BUSTER Dog Catheter, the new open-end catheter is ideal for flushing of the urethra to relieve urethral obstruction.

Perfect for

- Flushing of the urethra
- Passage check
- Bladder lavage
- Urine sampling

Helps relieve

- Urethral obstruction
- Urinary retention

Minimal patient discomfort

- Easy placement in situ
- Minimal pressure on the urethral wall during flushing

Best practice

An open-end catheter provides optimal conditions for flushing uroliths retrograde into the bladder.

User-friendly

The polypropylene catheter tubing is rigid and still flexible for easy catheter introduction and placement. The female Luer Lock fitting ensures easy and secure syringe attachment.

Increased patient safety

This catheter helps prevent unnecessary tissue damage thanks to the atraumatic, rounded end hole and because the hydro-pressure is directly aimed at the obstruction, not the urethral wall.

Andrew Jackson, DVM, DACVS states:

“Urethral obstructions in male dogs are common in veterinary practice. These obstructions can be difficult to relieve, and many patients are referred to emergency/specialty hospitals still obstructed. It doesn’t have to be this way! With a few precise but straightforward steps, general practitioners can relieve most urethral obstructions with minimal fuss to the patient.”

BUSTER Barium Cat Catheter

The soft polyurethane catheter softens at body temperature and has the highest biocompatibility of all the cat catheters.

- Made of soft and biocompatible polyurethane and hence ideal for hospitalized patients
- Suitable for long term use in situ (up to 7 days)
- Suture holes in the baseplate allows suturing to the prepuce
- Female luer lock fitting: easy connection to syringe or urine collection bag
- X-Ray detectable which makes the catheter ideal for locating obstructions

Cat. No	Description	Type	Size, Metric	Size, Imperial	Package
273467	BUSTER Barium Cat Catheter	Side holes, with stylet	1.0 x 130 mm	3 Fr x 5 1/8 in	12/pk
273468	BUSTER Barium Cat Catheter	Side holes, with stylet	1.3 x 130 mm	4 Fr x 5 1/8 in	12/pk

BUSTER Easy Slide Cat Catheter

Popular cat catheter now available in BUSTER brand with the same good properties and then a little more...

Made from DEHP-free (phthalate free) medical grade of PTFE Polytetrafluoroethylene the BUSTER Easy Slide Cat catheter is available in two forms: with open end or side holes both suitable for drainage and/or bladder lavage.

Features and benefits

- High biocompatibility
- Suitable for medium-long placement (3 days)
- Optimal rigidity (no need for stylet), though still with proper softness
- Highly lubricious catheter tubing material that ensures easy catheterization
- Flexible baseplate with suturing holes allows securing of the catheter to the prepuce
- Luer Lock fitting which enables syringe-attachment for flushing and/or attaching a urine bag collection system to the catheter
- Radiopaque – visible in x-ray
- Individually packed in easy-open pouch
- Small package size

SMOOTH AND LUBRICIOUS FOR EASY AND UNCOMPLICATED CATHETERIZATION

Cat. No	Description	Type	Size, Metric	Size, Imperial	Package
273400	BUSTER Easy Slide Cat Catheter	Side holes	1.2 x 110 mm	3.5 Fr x 4 1/8 in	5/pk
273401	BUSTER Easy Slide Cat Catheter	Side holes	1.2 x 140 mm	3.5 Fr x 5 1/2 in	5/pk
273436	BUSTER Easy Slide Cat Catheter	Open end	1.2 x 110 mm	3.5 Fr x 4 1/8 in	5/pk

273438	BUSTER Easy Slide Cat Catheter	Open end	1.2 x 180 mm	3.5 Fr x 7 in	5/pk

BUSTER Cat Catheters, side holes

BUSTER Cat Catheters with closed end and side holes
 Ideal for urine sample collection, urine retention relief and bladder lavage.
 The catheter is made from a DEHP-free medical grade PE, with good biocompatible properties.

- The luer lock adapter and the handle of the stylet are moulded for premium quality
- All catheters have rounded ends to avoid tissue damage
- Handles on luer lock adapter for better grip
- Suture holes in the baseplate allows suturing to the prepuce

Cat. No	Description	Type	Size, Metric	Size, Imperial	Package

BUSTER Cat Catheter, open end

The catheter with open end hole is useful for flushing uroliths retrograde into the bladder.
 The catheter is made from a DEHP-free medical grade PE, with good biocompatible properties.

- Extra rigid for easy introduction
- Handles on luer lock adapter for better grip
- Suture holes in the baseplate allows suturing to the prepuce

Cat. No	Description	Type	Size, Metric	Size, Imperial	Package
273338	BUSTER Cat Catheter	Open end, without stylet	1.0 x 130 mm	3 Fr x 5 1/8 in	12/pk

Sum up

BUSTER Foley Plus Catheter

- Silicone catheter with very high biocompatibility
- Suitable for long term placement
- Retention balloon to secure appropriate placement of the catheter

BUSTER Foley Catheter, Silicone

- Silicone catheter with very high biocompatibility
- Suitable for long term placement
- Retention balloon to secure appropriate placement of the catheter

BUSTER HC Urinary Catheter -Hydrophilic Coated

- Hydrophilic coated PVC catheter
- Ideal for short term use
- Reduces the friction and discomfort during catheterization

BUSTER NC Urinary Catheter -Non Coated

- Good biocompatible PVC catheter
- Flexible and soft for comfortable catheterization
- User-friendly end-opening box

BUSTER Dog Catheter

- Rigid PP tubing for easy introduction
- Biggest assortment world-wide
- User-friendly blister packaging

BUSTER Dog Flushing Catheter, Open End

- More rigid catheter
- Atraumatic, rounded end hole for optimal flushing
- Luer lock on hub allows easy connection to syringe or urine bag

BUSTER Barium Cat Catheter

- Soft, biocompatible PU catheter
- Softens at body temperature
- X-ray detectable

BUSTER Easy Slide Cat Catheter

- Biocompatible PTFE catheter
- Optimal rigidity (no need for stylet), though still with proper softness
- Flexible baseplate with suturing holes allows securing of the catheter to the prepuce
- Radiopaque – visible in x-ray

BUSTER Cat Catheter with side holes

- Biocompatible PE catheter
- Popular catheter with closed end and side holes
- Suture holes in baseplate
- Luer Lock and handles for better grip

BUSTER Cat Catheter with open end

- Biocompatible PE catheter
- More Rigid
- Suitable for flushing uroliths retrograde

Related Products

BUSTER Urine Bags, 750 ml, Luer Lock Connection

Connect the urine bag to a Buster Catheter or BUSTER NC Urinary catheter to collect and control urine flow during catheterization. The bag has a non-return valve, which prevent the urine from running retrograde. Further the bag has an indicative volume scale and a "push-pull" release valve, which makes it possible to empty the bag.

Cat. No 273855
10/pk

BUSTER Urine Bags, 750 ml, Adapter for Foley Catheter

Connect the urine bag to BUSTER Foley Catheter to collect and control urine flow during catheterization. The bag has a non-return valve, which prevent the urine from running retrograde. Further the bag has an indicative volume scale and a "push-pull" release valve, which makes it possible to empty the bag.

Cat. No 273856
10/pk

BUSTER Hanger for Urine Bags

Hanger for BUSTER Urine bags (Cat. No 273855 and 273856).
For easy handling of BUSTER Urine bags.
Easy to hang on surgery table or on the cage.

Cat. No 273857
10/pk

KRUUSE Urine Strips

Inexpensive and easy-to-read test. Coloured indicator squares on the strip can be compared with the colour chart on the label. Results appear in 60 seconds. Parameters: pH, nitrites, protein, glucose, ketones, bilirubin, urobilinogen, blood, leukocytes, specific gravity (For specific gravity we advise to use our refractometers).

Cat. No 290798
100/pk

Refractometer Specific gravity

For measuring the specific gravity in urine.

Normal range:
Dog: 1.015 - 1.040
Cat: 1.015 - 1.050

Cat. No 290916

Uri Pet

Uripet Urine sample collection
Easy devise for collecting urine sample from bitches.

Cat. No 273710
1/pk

Catrine Litter Pearls

Catrine Urine collection kit

This is a convenient and inexpensive kit for collecting urine samples from cats, developed specifically for the veterinarian and the cat owner.

Cat. No 275021

Kit4Cat

Kit4Cat, sealsand 3 x 300 gr

Kit4Cat is revolutionary biodegradable hydrophobic sand that has a natural non-toxic urine repelling coating.

It allows veterinarians, technicians, and cat owners to quickly and easily collect a cat's urine sample, without resorting to invasive procedures such as Cystocentesis.

The cat's urine will stay on top, allowing you to collect the urine using the pipette and vial that are included in every bag.

Cat. No 275011

Gel

BOVIVET gel 500 ml

Lubricating gel.

Apply gel on the catheter in order to make catheterization easier and more comfortable.

Cat. No 180520

KRUUSE Steril gel 250 ml

Lubricating gel.

Apply gel on the catheter in order to make catheterization easier and more comfortable.

Cat. No 340625
